

## MANAGED SECURITY SOLUTIONS

# STRENGTHEN YOUR DEFENCE

Organisations need to stay one step ahead of today's advanced threats. With the rise of tools like machine learning and artificial intelligence, threat actors have become a formidable challenge. A comprehensive and proactive approach helps you continuously monitor, manage, and respond to risks and compliance requirements. Don't let the evolving threat landscape catch you off guard.

Enhance clarity and context in threat monitoring

Manage Alert Fatigue and noise

Seamless interoperability of security systems

Leverage Automation and Orchestration

Simplifying the complexity of security investigations

Bridge the gap between the Security Operations Center (SOC) and the cloud

Harness the power of Threat Intelligence

## DID YOU KNOW?

**80%** say that manual investigation of threats slows down their overall threat response times  
Source: IBM

**81%** see vulnerabilities and misconfigurations as the biggest weakness within their infrastructure  
Source: Arctic Wolf

**60%** of organisations will embrace Zero Trust as a starting point for security by 2025  
Source: Arctic Wolf

**45%** of IT spending will be cloud-outsourced by 2024  
Source: Gartner

**76%** of organisations cannot achieve their security goals due to staffing concerns

## HARNESS THE POWER OF THREAT INTELLIGENCE

Discover real threats and strengthen your defences with the help of threat intelligence. Our external team will collect and prioritise threat data, providing valuable context that allows you to take action. Say goodbye to alert fatigue as we efficiently research and triage alerts from various sources. Let us empower your internal SOC team and enhance their ability to protect your organisation.

**57%** say their teams are overwhelmed by the number of security alerts
